PROFESSIONAL SUMMARY

Motivated Network Operations Engineer at HCLTech with hands-on experience in NOC operations, currently transitioning into GCP Cloud, Full Stack Development, and Generative AI. Skilled in React.js, MongoDB, and AWS, with strong expertise in network monitoring, incident management, and ensuring enterprise-grade system availability. Actively upskilling in GCP services, cloud-native architectures, and Gen AI integrations to deliver intelligent, scalable solutions. Proven ability to bridge network operations and software development in team environments.

WORK EXPERIENCE

NOC Engineer August 2025 – Present

HCLTech • Chennai, Tamil Nadu

- Monitor and maintain enterprise network operations (NOC) ensuring high availability, minimal downtime, and SLA compliance across production infrastructure.
- Performed real-time monitoring of network devices, servers, and services using NOC tools to detect and respond to alerts promptly.
- Coordinated with network and infrastructure teams to resolve connectivity issues, outages, and performance degradation within defined SLA windows.
- Handled incident management, root cause analysis, and escalation for critical network events; maintained detailed logs and incident reports for continuous improvement.

Web Development Intern September 2023 – November 2023

SmartKnower • Remote

- Built responsive web interfaces using HTML, CSS, JavaScript, and Bootstrap as part of team project deliverables.
- Gained practical experience with web development lifecycle, version control, and deployment practices.

KEY PROJECTS

Smart Order Automation – SaaS Platform | React + Vite, Tailwind CSS, Firebase, Razorpay, Twilio

- Built a multi-tenant SaaS platform with Firestore data isolation, role-based access control (Super Admin + 4 tenant roles), and subscription tier management.
- Integrated Razorpay payment gateway, PDF invoice generation, WhatsApp/Twilio notifications, and real-time analytics dashboard.
- Designed POS screen and implemented Firebase Cloud Functions for backend automation on a free-tier tech stack.

Student Quiz Management System | React.js, JDBC, MySQL

- Developed a full stack web app for student quiz management with authentication and role-based access control.
- Implemented RESTful APIs using Node.js connected to MySQL via JDBC.

Smart EV Management System | IoT, Gesture-Based Access Control

LS

Languages JavaScript, Python, HTML, CSS, python

Frontend React.js, Vite, Tailwind CSS, Bootstrap

Backend	Node.js, REST APIs, Firebase Cloud Functions
Databases	MySQL, MongoDB, Firebase Firestore
Cloud & DevOps	AWS (EC2, S3, Lambda, IAM), GCP (Compute Engine, Cloud Run, BigQuery, Vertex AI), Firebase, Vercel
NOC / Network	Network Monitoring, Incident Management, Troubleshooting, TCP/IP, DNS, SLA Management
Tools	Git, GitHub, n8n, Razorpay, Twilio, Figma, Postman
Concepts	OOP, DBMS, UI/UX Design, System Design, Agile

EDUCATION

B.E. Computer Science and Engineering August 2021 – October 2025

V.S.B College of Engineering Technical Campus • GPA: 8.1

Higher Secondary – Computer Science 2021

K. Kamarajar Matriculation HR Sec School • 82%

CERTIFICATIONS

- AWS Cloud Foundations – Great Learning
- React.js – HackerRank
- Oracle Database 12c R2 SQL: Controlling User Access – Oracle
- Web Development – SmartKnower
- UI/UX Design – Great Learning
- Python Programming – EMLITEZ Technologies

ADDITIONAL INFORMATION

Languages Spoken: English (Professional), Tamil (Native)

Seminar: Presented on Cyber Security at V.S.B College of Engineering (February 2024)

Interests: NOC Operations, GCP Cloud, Generative AI, Full Stack Development, SaaS Architecture, System Design

Portfolio: <https://muneeswaran.vercel.app>
